DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ho et al (6,905,621) in view of Lee et al (6,653,028). This rejection is set forth in prior Office Action, paragraphs 3-4, dated 1/12/06.
3. Claims 2-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ho et al (6,905,621) in view of Lee et al (6,653,028) as applied above and further in view of Blatchford, Jr. et al (6,680,150). This rejection is set forth in prior Office Action, paragraph 5, dated 1/12/06.

Response to Arguments

4. Applicant's arguments filed on or about 4/12/06 regarding the rejected pending claims have been fully considered but they are not persuasive because of the following reasons:

Applicants argue that the references as a whole does not teach the limitation recites: "an edge pattern at the edge of the contact pattern wherein the edge pattern is a half tone region" (see "Remarks", page 4, paragraphs 4-5). The Examiner disagrees because it is clearly that ho discloses the mask for forming contact (see Fig. 2a, reference 32) noting the Ho's mask 32 does have an exposure and non exposure

Art Unit: 3729

regions namely 33 and 34 and his exposure region 33 does include "an edge pattern at the edge of the contact pattern or hole" and the edge pattern of ho can be used as " a half tone region". Further, the claims directed to a structure such as "Mask " and the Ho reference does meet every aspect limitation of claim 1, therefore, the rejection based on Ho is valid for similar reasons as provided from record. Note: Applicant's arguments are more specific than the claim language. Applicant lends great means to the term "a half tone region". The examiner takes the position that the "half tone region" is broad and has not been greatly limited by the claims. The prior art relied upon satisfies the examiners interpretation of the claim language.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., that the present invention the edge pattern of the contact that produces the half tone effect, etc., see under the "Remarks" page 5, paragraphs 2-3) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not to be read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) And *In re*

Art Unit: 3729

Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, it is clearly that these references as relied by the Examiner are in the same field invention as the present application and the motivation for the combination can be found in either of the references (i.e., see Batchford Jr. discussion at col. 3, lines 46-67, or Lee' discussion at col. 1, lines 65-67, etc.).

For all reasons above, Applicants' arguments are not persuasive and are not clearly point out the patentable novelty which they think the claims present in view of the state of the art disclosed by the references cited or the rejections made. Therefore, the prior art rejection is maintained for same reasons of the record.

Interviews After Final

5. Applicants note that an interview after a final rejection will not be granted unless the intended purpose and content of the interview is presented briefly, in writing (the agenda of the interview must be in writing). Such an interview may be granted if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations, which would require more than nominal reconsideration or new search, will be denied. See MPEP 714.13 and 713.09.

Conclusion

6. It is noted that any amendment made to the disclosure and the claims. Applicant requires to point out the support provide numeral references to the claimed limitations

Art Unit: 3729

as well as support in the disclosure (i.e., page and line numbers and reference number associated with from the drawings) for better clarity (See 37CFR 1.111 and section 2163.06 of the MPEP).

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
